# LOCAL KID E.V.

With our association Local Kid e.V., we support people in Uganda on their way to independence. Our vision is to support people through education, knowledge and empowerment.

Many people living in the Batwa community in Uganda are addicted to alcohol due to their living situation. Not all children have access to education and health. Nevertheless, the whole community is very cheerful, open and talented. They are willing to work hard and contribute. That is why we want to offer the Batwa opportunities and possibilities to build their future together. To this end, we have built a children's home for children and young people in Kisoro. In our home, they find a new home and are supported on their way off the streets. This is why more and more children want to come to our home, but unfortunately we don't have enough space for all of them.

A new home is needed. And we need your help!

## Sustainable children's home with recyclable bottles

Our new children's home will provide space for a total of 50 children. We want to build it from recyclable plastic bottles, which will be cleaned and filled with soil to create new walls. In this way, we are not only doing something about the major plastic problem, but also giving the Batwa community a job and a perspective, as they will support us in the construction. This will create a large and sustainable children's home.

What else do we want for our children's home? A garden, 100 percent solar energy and water tanks so that we can collect and use our own rainwater. In line with our vision of helping people to help themselves!

And for this we need you! Help children in Uganda a safe home with your donation home and support them on their way to an independent and independent and happy future!
